

Fiche developed in the frame of 	TYPE:		AREA:
	Conference	Training	Robotics, autonomous systems, artificial intelligence
	European, national, regional project	University course Postgraduate studies	C4ISTAR: command, control, communications, computers, information/intelligence, surveillance
	Policy	Journal	Cybersecurity
Title:			
International Conference on Frontiers of Signal Processing			
Description	ICFSP is an annual event in France which provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration.		
Goal	The purpose of ICFSP is providing a good opportunity by admiring your updated research knowledge to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration. Indexed by Ei Compendex, Scopus, and others.		
Organizer			
Co-organizers/ Patrons	Sponsored by IEEE France Section, IEEE Signal Processing Society; co-sponsored by Institut Supérieur d'Electronique de Paris, Aix Marseille University, and other universities		
Topics	Adaptive Filtering & Signal Processing Ad-Hoc and Sensor Networks Analog and Mixed Signal Processing Applications of Signal Processing Cryptography and Network Security Design and Implementation of Signal Processing Systems Industry Technology Internet Signal Processing Machine Learning for Signal Processing Modulation and Channel Coding Multimedia & Human-computer Interaction Rapid Prototyping and Tools for DSP Design RF and Wireless Communications Sensor Array and Multi-channel Processing Video compression & Streaming Watermarking and Information Hiding		
Date	9-11 September 2021		
Costs
