Title: APPLIED INTELLIGENCE			
Description	With a focus on research in artificial intelligence and neural networks, this journal addresses issues involving solutions of real-life manufacturing, defense, management, government and industrial problems which are too complex to be solved through conventional approaches and require the simulation of intelligent thought processes, heuristics, applications of knowledge, and distributed and parallel processing. The integration of these multiple approaches in solving complex problems is of particular importance.		
Goal / Target audience	The journal presents new and original research and technological developments, addressing real and complex issues applicable to difficult problems. It provides a medium for exchanging scientific research and technological achievements accomplished by the international community.		
Publisher	Springer		
Topics/ Content	Artificial Intelligence, neural networks		
ISSN	ISSN print: 0924-669X ISSN online: 1573-7497
