Title: The 24th RoboCup International Symposium			
Description	<p>The 24th RoboCup International Symposium will be held in conjunction with RoboCup 2021 in a purely online setting, from 22 June to 28 June 2021. The organizers call for submissions of papers reporting innovative, original research with relevance to areas of robotics and artificial intelligence as listed below. Within the described scope of topics they also encourage submissions of high-quality overview articles, papers describing real-world research, and papers reporting theoretical results. Researchers are invited to submit their work independently of whether they participate in the RoboCup competitions or have a RoboCup team. In addition to the main track with regular research papers there will be a special track focused on systems, data, and benchmarks that will feature papers describing novel, open-source hardware and software systems, as well as datasets and benchmarks relevant to the community.</p>		
Goal	<ul style="list-style-type: none"> • Robot Hardware and Software • Perception and Action • Robot Cognition and Learning • Human-Robot Interaction • Multi-Robot Systems • Education and Edutainment • Applications and Benchmarking 		
Organizer	RoboCup Federation		
Co-organizers/ Patrons	University of Bordeaux, RoboCup France		
Topics	Mechatronics, computer science, electronics, mechanics, internet of things and artificial intelligence		
Date	22-28 June 2021
