Title:																																																										
27th IEEE International Conference on Automation and Computing																																																										
Description	The conference covers a broad spectrum of multidisciplinary areas in automation, smart manufacturing, robotics, control, computing and information systems, ranging from fundamental research to real-world practical applications.																																																									
Goal	The aims of the conference are to provide a forum for scientists, engineers, scholars and students to exchange ideas and update technical knowledge, as well as to provide a platform where joint research programmes can be formulated for mutual benefit. The conference welcomes participation and contributions from those involved in both theoretical and practical research on all aspects of automation, control, manufacturing and computer science.																																																									
Organizer	The Chinese Automation and Computing Society in the UK																																																									
Co-organizers/ Patrons																																																										
Topics	Additive Manufacturing, Artificial Intelligence, Autonomous Systems, Big Data and Data mining, Cloud Computing, Control theory and Application, Cyber Physical Systems, Digital Manufacturing and Enterprise Technologies, Digital Twins, Flexible and Computer, Integrated Manufacturing, Human-Machine Collaborations, Information and Network Security, Information Technology and Systems, Intelligent System and Automation, Internet of Things, Machine Learning, Machine Vision and Image Processing, Metrology and Inspection technology, Neural Networks, Fuzzy Logic and Genetic Algorithms, Non-destructive Testing and Condition Monitoring, Optimisation and Decision Making, Production Planning and Scheduling, Prognostics and Diagnostics Robotics, Smart Sensing Technology, System Diagnosis and Identification, System Control, Modelling and Simulation, Virtual and Augmented Reality, Wireless Sensor Networks																																																									
Date	1 September 2022 - 3 September 2022
