	Conference	Training	Robotics, autonomous systems, artificial intelligence
	European, national, regional project	University course Postgraduate studies	C4ISTAR: command, control, communications, computers, information/intelligence, surveillance
	Policy	Journal	Cybersecurity
Title: XVI. International Conference on Military Robotics and Autonomous Systems ICMRAS			
Description	XVI. International Conference on Military Robotics and Autonomous Systems is the premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Military Robotics and Autonomous Systems.		
Goal	The conference aims to bring together presenters and attendees from different fields with expertise in various areas of Mechanical and Materials Engineering, providing an excellent opportunity to participate in the international exchange of ideas, current strategies, concepts and best practices, collaborations, and cooperation, offering a broader perspective and more enriching experience.		
Organizer	World Academy of Science, Engineering and Technology		
Co-organizers/ Patrons			
Topics	Military robotics, Military robotics, current uses and developments, Advantages and disadvantages of military robots, Ethical and legal concerns about military robots, Ethical issues regarding artificial intelligence, Military robotics and operations, New technologies in military robotics, Armed robots and unmanned war, Robotics mechatronics, automation, and system integration, Military robot actuator design, Military robots and motion control, Military robot sensor design, fusion, and networks, Military robot vision, audition, and mechanism design, Military robot kinematics and dynamics, Mobile robot, path planning, and navigation for military robots, Manipulator nano/micro military robots, Human-robot interaction in military science		
Date	08 Sep 2022 - 09 Sep 2022		
Costs	€300 - €500
