

New ASSETs+ Courses: Learn new skills related to key emerging technologies in Defence

April 2023

Currently, more than three quarters of companies in the EU say they have difficulties finding workers with the necessary skills, while only 37% of adults undertake training on a regular basis. The Defence sector is no exception.

The fast pace of technological evolution is radically changing the labour market. Design educational content for the workforce of the near future is essential.

ASSETs+ is designing and developing new courses related to key technologies that will be expected in the Defence sector in the coming years.

These **free** and online programmes are focused on professionals working in the Defence and AeroSpace industry (up-skilling & re-skilling) and university students (undergraduate and graduate), and will take place in May and June.

The courses are **exclusive for** partners of the ASSETs+ consortium and members of our Network. To become part of our ecosystem, just fill out a 5-minute form before enrolling in the course. (<https://assets-plus.eu/call-for-associated-stakeholders/>)

NEW FREE ONLINE COURSES:

- **Management of the Maintenance and Equipment Documentations**
 - Dates: 12-19 May, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and University undergraduate students
 - 12 hours
 - Online – English
- **Drone Electronic Devices. Technology & Programming**
 - Dates: 15May-7June, 2023
 - Focused on: Professionals working in Defence & AeroSpace industries and university undergraduate students
 - 28 hours
 - Online – English
- **Overview on Integrated Logistic Support (ILS) Standard ASD**
 - Dates: 22May, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and University undergraduate students
 - 4 hours
 - Online – English
- **Cybersecurity**
 - Dates: 22-26 May, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries
 - 37 hours
 - Online – English
- **AI for Defence**
 - Dates: 22May-9June, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries
 - 15 hours
 - Online – English

- **REACH Compliance and Circular Economy in the Aerospace & Defence Industry**
 - Dates: 29May, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and University undergraduate students
 - 4 hours
 - Online – English
- **Reverse Engineering. Photogrammetry in Defence Environments**
 - Dates: 2 June, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and University undergraduate students
 - 2 hours + 10h asynchronous
 - Online – English
- **Remote Sensing Image Analysis**
 - Dates: 5-12 June, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and University undergraduate students
 - 5,5 hours
 - Online – English
- **RF Architectures for Software Radio Transceivers in Defence Environments**
 - Dates: 21-30June, 2023
 - Focused on: Professionals working in Defence and AeroSpace industries and graduate students
 - 13 hours
 - Online – English

The ASSETs+ project

The Alliance for Strategic Skills addressing Emerging Technologies in Defence (ASSETs+) is a four year **Erasmus+ project**, built on close collaboration between Defence Industry, Sectoral Organisations, Higher Education Institutions, Vocational Educational & Training providers and Research Centres, with 30 partners from 8 countries and a broader ecosystem of stakeholders.

ASSETs+ aims to build a sustainable human resources supply chain for the European Defence Industry, that boosts innovation by both attracting highly-skilled young workers and upskilling its employees. Complementary education & training programmes are addressing the following main technologies: Artificial Intelligence, Robotics, C4ISTAR* and Cybersecurity.

(*) C4ISTAR is an acronym for Command, Control, Communications, Computers, Information/Intelligence, Surveillance, Targeting Acquisition and Reconnaissance
