SKILLS

ASSETs+
Alliance for Strategic Skills addressing Emerging Technologies in Defence
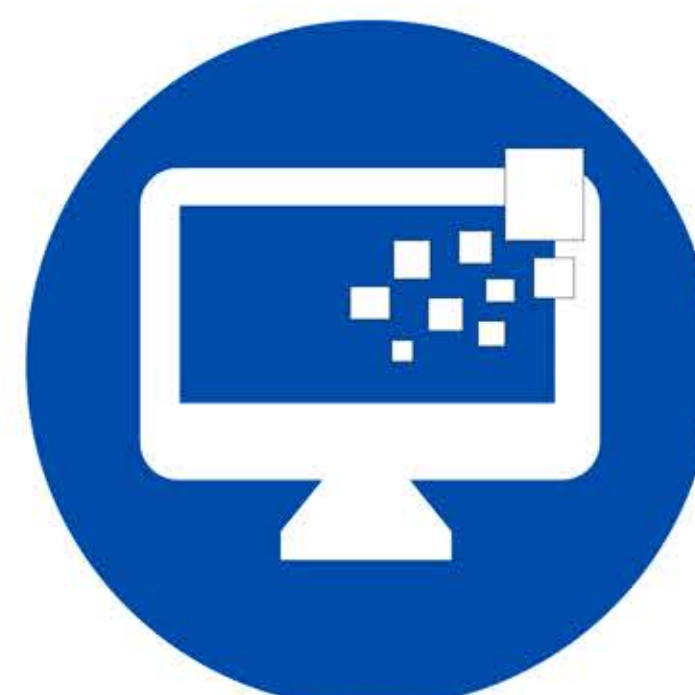

Education & Training

ASSETs+ has designed education & training programmes to provide trainees with new skills related to key technologies that will be expected in the Defence sector in the coming years, most notably:

AI

ARTIFICIAL INTELLIGENCE

ROBOTICS

C4ISTAR

CYBERSECURITY

These programmes are built on active pedagogical approaches like projectbased learning, summer schools, challenges, e-learning. The ASSETs+ courses are focused on professionals (Defence & AeroSpace) as well as undergraduate and graduate students. With the perspective of implementing in different learning contexts, course providers will gather extensive information and suggestions to improve the content and format of the courses.

35 **courses**
implemented
(2020-2023)

over 1300
participants

from over 23
different countries
