

ASSETs+ crash course on ChatGPT

“Using Generative AI to boost productivity at work and ... not only”

Online. July 20, 09:00-11:00 CEST

The **ASSETs+** team of the [University of Pisa](#) is organizing the crash course on **ChatGPT**: “Using Generative AI to boost productivity at work and ... not only”, that will take place **online** next **July 20, from 9:00 to 11:00 CEST**.

The course is designed to empower **defence employees and professionals** with the knowledge and skills to leverage **ChatGPT**, an advanced language model, to enhance productivity and automate office processes. It will address some common productivity challenges faced by industrial organizations and demonstrate how **ChatGPT** can streamline workflow and automate tasks.

Participants will gain an understanding of **ChatGPT**’s capabilities and its potential applications, and they will learn how to integrate **ChatGPT** into existing office automation systems, improve communication and collaboration, analyze data, and support decision-making processes.

Ethical considerations and security protocols will also be discussed.

The course includes hands-on practical exercises to allow participants to apply their knowledge.

This crash course is **focused on professionals working in the Defence and AeroSpace Industry** (partners of the ASSETs+ consortium and associated stakeholders), but those in academia (belonging to ASSETs+) are welcome to attend as spectators.
