

2023 European Year of Skills

New Year, New Goals, New Skills to learn...

Currently, more than three quarters of companies in the EU say they have difficulties finding workers with the necessary skills, while only 37% of adults undertake training on a regular basis. The Defence sector is no exception.

The fast pace of technological evolution is radically changing the labour market. Design educational content for the workforce of the near future is essential.

The **ASSETs+ project** is designing [new courses](#) that aim to provide trainees with new skills and knowledge related to key technologies that will be expected in Defence sector in the coming years.

ASSETs+ New Courses:

These **FREE online programmes** are **EXCLUSIVE FOR** partners of the [ASSETs+ consortium](#) and [associated stakeholders](#). If you want to join the ASSETs+ Stakeholders Group and become part of our ecosystem, you just have to fill out a 5 minute form [here](#) before signing up for the course.

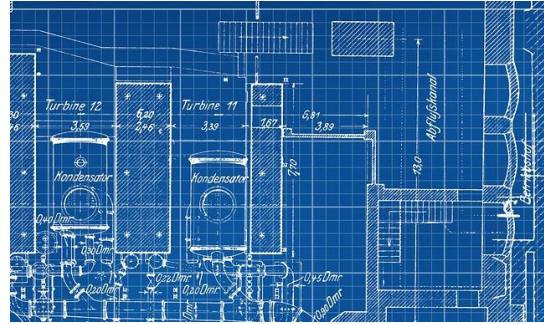

21 February-9 March, 2023 (22 hours)

Cybersecurity in the digital world

Focused on: Engineering Degree, Master students and Professionals

[Register now!](#)

20-24 March, 2023 (7 hours)

Systems Engineering

Focused on: Professionals and University Licence students

[Register now!](#)
